

HARISH GOPAL

Chennai, Tamil Nadu | +91-8610603212 | harishgp2005@gmail.com

[linkedin.com/in/harish-gopal](https://www.linkedin.com/in/harish-gopal) | github.com/Harish8979

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C++
Frameworks & Libraries: React.js, Node.js, Spring Boot, Pandas, Matplotlib, TensorFlow/Keras (CNN), HTML5, CSS3
Tools & Platforms: Docker, OAuth, Git, GitHub, VS Code, IntelliJ IDEA, Linux, AWS
Core Concepts: Data Structures & Algorithms (DSA), OOPs, Microservices, IoT, Networking, Software Engineering

EXPERIENCE

Sagent Ltd Jan 2026 – Apr 2026

Backend Developer Intern Chennai, India

- Engineered robust backend logic for scalable mortgage-based applications utilizing Spring Boot, delivering critical financial solutions tailored for global mortgage originators.
- Architected and deployed microservices to break down monolithic components, significantly improving system maintainability, fault tolerance, and project scalability.
- Containerized application modules using Docker to streamline cross-environment deployment pipelines and ensure consistent runtime environments.
- Integrated secure authentication mechanisms utilizing OAuth, ensuring strict data privacy and compliance with global financial security standards.

Prodian Infotech Pvt. Ltd May 2025 – June 2025

Full Stack Web Developer Intern Chennai, India

- Applied core Software Engineering principles to analyze user requirements and deliver robust technical solutions, significantly enhancing web application performance.
- Streamlined development work processes to ensure consistency and reliability in backend logic utilizing Java and Python.
- Collaborated in a fast-paced environment, actively monitoring system health and incorporating stakeholder feedback to improve software quality.

PROJECTS

Smart Fridge & Automated Grocery Management | Python, CNN, IoT, Load Cells Dec 2025

- Developed an intelligent inventory system using Convolutional Neural Networks (CNN) to visually identify groceries and integrated IoT Load Cells to monitor ingredient weight and consumption in real-time.
- Programmed a recommendation engine with 100+ recipes that cross-references current fridge inventory, automatically identifying missing ingredients required for specific meals.
- Engineered a cost-optimization algorithm that scrapes and compares prices across multiple Quick Commerce apps, calculating the lowest total bill for missing items and executing automated orders upon user approval.

Drone Delivery Airspace App | *React.js, Python, DigitalSky Map API*

Dec 2024

- Executed innovative software projects for Quick Commerce, implementing creative algorithms to automate complex drone delivery operations.
- Defined clear system responsibilities for real-time zone detection (Red/Green/Yellow), ensuring efficient time management in delivery routing.
- Visualized authorized flight corridors for logistics products using React.js, ensuring compliance with DGCA safety standards.

EDUCATION

SRM Easwari Engineering College

2023 – 2027

Bachelor of Engineering in Computer Science (CGPA: 8.02/10)

Chennai, India

- **Coursework:** Data Structures & Algorithms, Object Oriented Programming, DBMS, Web Technology, OS.

CERTIFICATIONS & AWARDS

- Introduction to Cybersecurity – Cisco Networking Academy (Nov 2025)
- Programming using Java – Infosys Springboard (March 2025)
- Networking Basics – Cisco Networking Academy (Sep 2024)
